ABOUT THIS REPORT

This summit report has been prepared by the Congress Aboriginal Male Health Team

It is essentially a recording of the information exchanged, the issues raised and the solutions proffered both from the summit workshops and the resolutions.

But most importantly it is all about monitoring in the long term the government’s responses and commitments to overcoming indigenous disadvantage that is needed to address the underlying social and environmental factors contributing to child abuse.

Part 1-Executive Summary-An ongoing action plan that “will not gather dust”

We have summarized the issues and outcomes in an ongoing 5 step action plan:

1. Workshop it.
2. Recommendation It
3. Measures It
4. Get government to action
5. Review it over a period of time (1/5/10 years)

Part 2-What were the issues –What were solutions male delegates came up with!

In this part of the report our delegates and facilitators have listed all the issues and outcomes that came out of the workshop

How often have you gone to a meeting or conference and when you later get the reports or minutes you cannot see your contribution. Well here is our delegate input “unedited”

We would welcome your feedback and comments
